## Our Message

ATEIS Middle East FZCO has an enviable track record of over 1000+ major installations in the Middle East and India. The ATEIS brand name is synonymous with quality and is backed with the assurance of responsibility and rapid response --- essential in building a strong relationship with our customers.

Operating from our local offices, our 20 specialized engineers constantly strive for excellence and outstanding performance. By maintaining its headquarters in Dubai, with support offices in Abu Dhabi, Kingdom of Saudi Arabia and India, ATEIS Middle East FZCO is guaranteed to remain closer to the end user.

We deliver high end Voice Evacuation, Fire Alarm, Public Address, Background Music, Professional Audio and Automation Systems that guarantee security and protection backed by high - fidelity sound, to provide an unbeatable combination of comfort and peace of mind.

**Hussam Al Haddad**  
Managing Director

## Vision

To distinguish the **ATEIS** brand as one of **QUALITY**; To lead the Safety, Security, Hospitality, Entertainment and Automation Market segment with **RESPONSIBILITY**; To deliver high end support and technical solutions with **INNOVATION**, And to be the Dominant brand in our field of proficiency tagged with **EXCELLENCE**.

## Policy

The **ATEIS Middle East FZCO** Family promises the delivery of its services and products with **RESPONSIBILITY** and ensures rapid **RESPONSE** to the customer needs and requirements, both commercially and technically. It strives to develop **RELATIONSHIP** excellence built on trust, loyalty, support, confidence, ethical values and transparency.

## Approach

**ATEIS** is continuously looking to improve and extend what it does. One way is by thinking in terms of solutions rather than products. This mindset is supported by the way we are organised, which improves cooperation internally and with our customers. It means we can offer the same solutions wherever and however you want them. Clustering our businesses ensures we can react more quickly to changing customer demands.

## ATEİS Middle East History

As Managing Director of the **ATEİS Middle East FZCO**, **Hussam Al Haddad**' clear vision was to dominate this market segment and to make **ATEİS** the customer's first choice in the field of Voice Evacuation, Public Address, Background Music and Professional Audio.

In September 2006, **ATEİS Middle East FZCO** was established, and became strategically placed to serve the Middle East region and be closer to the rapid boom taking place in the construction market segment.

The young company rapidly took a leading role, establishing the **ATEİS** brand in this burgeoning market place tagged with Quality and serving its customers with Responsibility. Today, **ATEİS Middle East** has over 20 engineers dedicated to supporting the Middle East and Indian markets, commercially and technically, operating from four strategic locations in Dubai, Abu Dhabi (in the UAE), Kingdom of Saudi Arabia and three locations in India (Mumbai, Delhi and Bangalore).

**ATEİS Middle East FZCO** is an ISO9001 Certified Organization, as well as member of the BSI and FIA; all the company's products carry either Kitemark or TUV approvals.

## SERVICES

**ATEİS Middle East** services over 85 distributors in the region. This strategic structure allows the organization to respond to the customer's needs in an orderly fashion and provide the prompt service required. This decentralized approach in catering for business needs is not a new concept in business management — however it is one that **ATEİS Middle East** has mastered effectively.

With more than 35 years of Public Address and Voice Evacuation System experience behind it, **ATEİS Middle East** has built on the strong foundation of the organization to provide end-to-end solutions, totally integrated on a single platform.

The new generation of integration tools not only complies with BS5839 part 1 and 8, EN 60849, EN54 part 1 and 4, but also with BS6259 where integration with Professional Audio is essential in today's complex building projects.

The integrated Voice Evacuation and Public Address System is not a new technology in the market place: it was recommended by BS5839 part 8:1998 and welcomed by NFPA72:2002. In today's complex environments, Personal Safety and Property Security requirements demand more than just Voice Evacuation

in the event of a Fire Alarm incident. To protect the properties of today more than just recorded messages are required. The complex needs of property safety against terror threats, natural disasters and many other safety and security issues also need to be taken into account.

What is also required today is the true integration of the Voice Evacuation, Public Address, Background Music system with the Professional Audio. Many applications such as Shopping Malls, Hotels, and Restaurants require high - fidelity systems to be integrated with the Voice Evacuation System — resulting in less cost, greater security and reliability.

The **ATEİS** Digital Signal Processing technology, with more than 48 audio channels and a fault tolerant structure, make available all the requirements of high-end Voice Evacuation, Public Address and deliver breathtaking Professional Audio capability which comply with all international safety regulations.

Many installations have been completed in the Middle East adopting this innovative approach, providing the end user with peace of mind and opening up new horizons for an endless string of features and capabilities that are second to none.

#### THE YEAR WHEN THE ATEIS ASSOCIATION WAS BORN

Four years later it starts to grow employing five engineers. Pioneers when it comes to the transition of computers into broadcast audio-mixers. Our two pioneers are among the first one to launch computerized mixing tables. Besides that, they also worked on tailored audio solutions covering a niche market.

**1980**

**1999**

Yes, the one who equipped so many independent radio stations in the 80s...? Nostalgia now, at that time a famous radio adventure where two French engineers in electronics, Robert Seassauand Bernard Charreton, created this mythical radio console.

**1982**

Four years later, the demanding requirements of the SNCF to improve the sound quality at their stations brought ATEIS to cooperate with a partner called: SLVS (Lyon's association for Video surveillance and PA system), run by Roland Labrosse. SLVS just picked up a refurbishment of the PA-systems for the TGV and could use the specialism of ATEIS, with its experience at the SNCF, to implement their SAM system.

In 2006 ATEIS was tasked to expand her businesses and to expand their sales outside of the French speaking areas. Starting with subsidiaries in Switzerland; ATEIS International SA, for the distribution of products in the European market, and ATEIS Middle East in Dubai for the distribution in the Emirates and India.

**2003**

**2007**

ATEIS leaves in search of a new partner. Market is moving fast and economical production was required in order to survive in the next decades to come. It finds a partner in Taiwan, PCI, one of the world leaders in manufacturing speakers and electronics. Both companies saw opportunities and, in spite of the distance and the culture differences, they decide to join their R&D and manufacturing facilities.

**2006**

Audio over IP has become a very common item nowadays. But in 2007 this was a state -of-the-art development, proving the strength and knowhow of ATEIS. Encoding/decoding audio is one thing, but bringing the features that the market needs is another one.

**2000**

A Year later the two companies were merged and continued their works under the company and brand name of ATEIS. As solution providers and manufacturers for professional sound systems for the Public Address and Voice Evacuation market, at their new office in ST Martin d'Hères, their business finally separated from the Pro-audio market.

#### THE ODYSSEY CONTINUES

It is the Year of the introduction of a whole new counter intercom system, known as: Magellan, a by now well known device that is servicing happily at almost every counter desk at the SNCF. After going through European tender, ATEIS was awarded with the order to develop and manufacture a counter intercom system for SNCF (French national railway company).

**2002**

#### GOODBYE ANALOGY...

In 2002, new safety standards were introduced in France, like the ERP that applied for public accessible buildings. Customers like SNCF (French national railway company), the RATP (Paris public transportation System) and numerous French airports chose for ATEIS.

**2001**

The period of the standards that has put high pressure on manufacturers to adapt their electronics and loudspeakers to this demanding EN54 standard. ATEIS has proven to be capable and flexible. With over 30 speakers and 2 VACIE sets, DIVA8 and the new powerful IDA8 controller, ATEIS is ready to compete complying with the EN 54-16, 24 and 4.

**2009**

With the acquisition of the Messenger, ATEIS joined the market for steerable line-arrays, based on DSP-technology and a patent algorithm that have been fully redesigned to meet the industries standards for Voice Alarm, commercial audio and Pro-sound. IDA4 needed to be updated and market demands required a change of approach.

**2011**

**2015**

**HISTORICAL HIGHLIGHTS**

## Why Intelligibility?

A poorly designed or installed sound system can be both annoying, and more importantly make it difficult to hear important information being broadcast over the system. The consequences can be dangerous, or even fatal, if safety instructions from a building's emergency voice evacuation system cannot be understood.

The main objective of any Voice Announcement system is to provide intelligible and clear messages to the public when needed. All the international standards strive to provide more information and adherence to these requirements. For example, BS5839 part 8, NFPA72 and EN60849 all demand STI-PA "Speech Transmission Index – Public Address" of 0.5 as minimum "on a scale of 1 or 100%". This index indicates the clarity of the message broadcast — whether recorded or live.

**ATEİS Middle East** provides acoustic calculations and system designs which excel in the field of sound, and deliver safe and secure installations to the end user. Whether via our certified engineers or our trained distributors in the region, quality assurance and a responsible approach are implemented by the **ATEİS Middle East** family to ensure intelligible sound is delivered via the systems designed and installed. Loading Fire Alarm Systems **ATEİS Middle East** is setting new standards of Fire Detection technology, and has launched a state-of-the-art Fire Alarm System under the product name **VELOX**.

In ancient Latin **VELOX** means Rapid or Fast — and this is exactly how the new fire detection will act. The new technology is fully integrated with the **ATEİS** legendary Voice Announcement and Public Address System "PAVA", as well as its high end 48 audio channels of secure network. The entire network will expand up to 200 nodes in a Fire Alarm or PAVA system, as well with the fully-integrated Addressable Fire Telephone System.

This new technology will unquestionably ignite a revolution in the Fire Detection industry, and surpass expectations with its detection capability, the fidelity of its Voice Announcement system and totally expandable high end Professional Audio systems.

## Automation Made Easy?

**ATEİS Middle East** has developed amazing automation capability, which is fully integrated with its Audio and Acoustics solution to deliver state-of-the-art technology with breathtaking fidelity.

A wide range of touch screens, dimmers and controls have been built around the world's known protocols such as EIB, Modbus, BACnet and others. **ATEİS Middle East** can provide full design capability and training to all distributors and end users, and provide solutions that are easy to operate, maintain and manage.

## Ateis University

Training and education represent a continuous mission within the **ATEİS** family. With the **ATEİS** University, the company has made technical competence a reality — and most important, admission to their courses is free of charge.

At **ATEİS** University, the company can access train the registered distributors on-line, providing them pre-test exams and then registering them on the final exam, which can take place locally via **ATEİS**' offices across the region. Once standard has been achieved, the trainee will be issued with his Certificate, and henceforth need to demonstrate year-on-year improvement to ensure the ongoing validity of such certificate.

This continuous process of learning will ensure that the high quality of service is maintained.

## Approvals Are Necessity ...Not A Luxury

**ATEİS Middle East** constantly strives for approval and certification by the different third party approval bodies, to ensure safety, quality and reliability.

Aside from being ISO9001 certified, **ATEİS Middle East** holds the BSI approval, TUV approval and is a member with the many Fire and Safety International bodies such as FIA, LPCB and NFPA. In addition, **ATEİS Middle East** is locally approved by the authorities having jurisdiction in the different countries in the Middle East and India.

ATEIS développe les technologies et fabrique les produits qui permettent à nos clients de diffuser des messages sonores et visuels dans les lieux publics.

Nous restons à la pointe de la technologie, afin de garantir, à nos partenaires, qu'ils aient en permanence les meilleurs outils disponibles à la réalisation de leurs projets.

Nous continuons à dialoguer avec les utilisateurs et à apprendre chaque jour de nos clients, afin d'améliorer nos produits et nos services. Notre stratégie est d'être économique, efficace, durable, flexible et de permettre à nos partenaires de répondre rapidement aux besoins du marché et des clients.

ATEIS ontwikkeltenfabricerettechnologieën, producten en systemen die onze afnemers oplossingen bieden om akoestische en visuele informatie te verstrekken in industriële en publieke toegankelijke ruimtes.

Wij blijven altijd gefocuseerd op huidige en nieuwe technieken, hoe snel deze ontwikkelingen ook gaan, om onze klanten altijd de beste oplossingen te garanderen.

Wij zullen aandachtig luisteren en leren van onze klanten om zo onze producten en services te verbeteren.

Wij streven naar maximale economische haalbaarheid, efficiëntie, duurzaamheid en flexibiliteit met als doel om onze afnemers snel te kunnen laten inspringen op markt en klant specifieke behoeften.

“Η ΑΤΕΙΣ αναπτύσσει την τεχνολογία και κατασκευάζει προϊόντα που επιτρέπει στους πελάτες της για να μεταδώσουν οπτικοακουστικά μηνύματα σε στοχευμένο κοινό σε δημόσιους χώρους.  
Θα είμαστε πάντα στην κορυφή της τεχνολογίας του σήμερα και του αύριο, ανεξάρτητα του πόσο γρήγορα κινείται, ώστε να εξασφαλίσουμε ότι οι πελάτες μας θα έχουν πάντα τα καλύτερα εργαλεία στη διάθεσή τους.  
Θα επικοινωνούμε συνεχώς με τους πελάτες μας και θα μαθαίνουμε από αυτούς, προκειμένου να βελτιώσουμε τα προϊόντα και τις υπηρεσίες μας.  
Η στρατηγική μας είναι να είμαστε ανταγωνιστικοί στις τιμές, αποτελεσματικοί, ανθεκτικοί, ευέλικτοι και να επιτρέπουμε στους αντιπροσώπους μας να ανταποκρίνονται γρήγορα στις ανάγκες τόσο της αγοράς και των πελατών τους.”

ATEIS udvikler og producerer teknologiske produkter og systemer for udsendelse af akustiske og visuelle budskaber til udvalgte målgrupper på offentlige steder.

Vort mål er, at være førende i teknologi både i dag og i fremtiden uanset hvor hurtigt denne måtte ændre sig, dette sikre at vore kunder altid har det bedste værktøj til rådighed.

Vi vil konstant kommunikerer med vore kunder for at lære og forstå deres behov for nye løsninger, så vi hele tiden kan forbedre vore produkter og service.

Vor er strategi at være økonomiske, effektive, stabile, fleksible for at sikre vore samarbejdspartnere så de kan reagere hurtigt i markedet og følge kundernes behov.

**Spoločnosť ATEIS vyvíja a vyrába technológie, produkty a systémy, ktoré umožňujú našim zákazníkom cieľene nasmerovať akustické a vizuálne oznamy určenej skupine osôb na verejných priestranstvách. Bez ohľadu na to, ako rýchlo napreduje vývoj technológií v tejto oblasti, spoločnosť ATEIS neustále prináša svojim zákazníkom tie najlepšie nástroje pre ich prácu. Naša spoločnosť ustavične komunikuje so svojimi zákazníkmi a učí sa od nich, aby mohla zdokonaľovať svoje produkty a služby.**

**Našou stratégiou je byť úspornými, výkonnými, stálymi a flexibilnými a umožniť tak našim obchodným zástupcom rýchlo reagovať na potreby trhu a jednotlivých zákazníkov.**

تقوم أتييس بتطوير وتصنيع التكنولوجيات والمنتجات والأنظمة التي تتيح لعملائنا الكرام استخدام الرسائل السمعية البصرية الموجهة الى الجمهور في الأماكن العامة .

نعم سنعمل بحق اليوم و غداً على الحفاظ على مستوى التميز التكنولوجي ليكون في قمته أياً كانت سرعة التطور مما يضمن لعملائنا الكرام دوماً الحصول على أفضل المنتجات التي نوفرها لهم ، كما سنعمل باستمرار على التواصل معهم و الاستفادة من ملاحظاتهم حيث يمكننا ذلك من تطوير منتجاتنا و خدماتنا .

تتمثل الاستراتيجية التي نتبعها في التميز على المستوى الاقتصادي و الكفاءة و ديمومة المنتجات و المرونة فضلاً عن تمكين مندوبينا من التعامل بسرعة مع كل من احتياجات السوق و عملائنا الكرام .

ATEIS sviluppa e produce tecnologie, prodotti e sistemi che permettono ai nostri Clienti di inviare messaggi sonori e visivi a audience mirate in luoghi pubblici.

Continueremo a rimanere al top della tecnologia odierna e futura, non importa quanto velocemente evolva, per assicurare ai nostri Clienti i migliori strumenti disponibili sul mercato.

Continueremo a comunicare con i nostri Clienti e impareremo da loro, per migliorare i nostri prodotti e servizi.

La nostra strategia è quella di essere competitivi, efficienti, affidabili, flessibili e di permettere ai nostri partner di rispondere rapidamente sia alle esigenze del mercato che dei clienti.

ATEIS utvecklar och tillverkar teknologi, produkter och system som gör det möjligt för våra kunder att nå ut med akustiska och visuella budskap till rätt målgrupp på offentliga platser.

Vi ligger på topp när det gäller såväl dagens som morgondagens teknik, oavsett hur snabb utvecklingen är, för att garantera att våra kunder alltid har de bästa verktygen.

Vi lyssnar till våra kunder för en ständig dialog att fortlöpande kunna förbättra våra tjänster och produkter.

Vår strategi är att vara prisvärda, effektiva, hållbara och flexibla. Därför kan vi alltid vara följsamma till både marknadens och kundernas behov.

A ATEIS desenvolve e fabrica tecnologias, produtos e sistemas, que permitem aos nossos clientes endereçar mensagens visuais e acústicas a públicos-alvo presentes em espaços públicos. Iremos acompanhar o ritmo da tecnologia do presente e do futuro, por mais rápidas que estas se desenvolvam, para assegurar que os nossos Clientes tenham sempre à sua disposição as melhores ferramentas possíveis.

Continuaremos a comunicar e a aprender com os nossos Clientes, de forma a melhorar os nossos produtos e serviços. A nossa estratégia passa pela economia, eficiência, durabilidade, flexibilidade, e passa também por permitir que os nossos representantes possam assegurar rapidamente as necessidades dos clientes e dos mercados.

ATEIS 致力發展有關音頻處理器產品及系統的製造科技，可讓客戶在公共場所裡，向群眾傳達清晰的聲音及影像的訊息。

無論科技發展的速度多麼迅速，我們永遠與今日最頂尖和未來的科技同步化，以確保客戶擁有最好、最先進的設備。並為了增進產品及服務，我們持續不斷地與顧客溝通，向顧客學習。

我們的經營策略是經濟、效率、耐久、彈性，並快速回應市場與客戶的需求。

ATEIS entwickelt und produziert Technologien, Produkte und Systeme zur Verteilung von akustischen und visuellen Informationen. Zielmärkte sind der öffentliche Bereich, gewerbliche Anwendungen und die Industrie.

Durch den Einsatz zukunftsorientierter Technologien garantieren wir unseren Kunden stets aktuelle und moderne Lösungen.

Wir haben den Anspruch dabei ökonomisch, effizient, zuverlässig und flexibel zu handeln, um schnell auf Marktentwicklungen und Kundenbedürfnisse reagieren zu können.

ATEIS razvija i proizvodi tehnologije, proizvode i sustave koji će omogućiti našim klijentima da prenesu zvučne i vizualne informacije ciljanoj publici na javnim mjestima.

Idemo u korak sa sadašnjim i budućim tehnologijama, bez obzira na brzinu razvoja, kako bismo osigurali da naši klijenti u svim situacijama imaju najbolje moguće proizvode. S klijentima kontinuirano komuniciramo i od njih učimo kako bismo poboljšali svoje proizvode i usluge.

Naša strategija je ekonomičnost, učinkovitost, pouzdanost i fleksibilnost, te brza reakcija naših predstavnika zahtjevima tržišta i klijenta.

ATEIS utvikler og produserer teknologier, produkter og systemer som gjør det mulig for våre kunder å formidle akustiske og visuelle meldinger til ønsket målgruppe på offentlige steder.

Vi vil alltid være ledende på dagens og morgendagens teknologi, for å sikre at våre kunder alltid har de beste verktøyene tilgjengelig for dem.

Vi vil ha kontinuerlig dialog med våre kunder, slik at vi til enhver tid har den informasjonen vi trenger for å forbedre, tilpasse og optimalisere våre produkter og tjenester.

Vår strategi er å være økonomiske, effektive, solide og fleksible slik at våre representanter kan reagere raskt til både markedets og kundenes behov og ønsker.

ATEIS desarrolla y fabrica los sistemas, los productos y la tecnología que permiten a nuestros clientes dirigir mensajes acústicos y visuales a la audiencia de destino en lugares públicos.

Nos mantendremos en la cima de la tecnología del presente y del futuro, no importa cuán rápida evolución, para asegurar que nuestros clientes siempre tienen las mejores herramientas a su disposición. Nos comunicaremos continuamente con nuestros clientes, y aprenderemos de ellos, a fin de seguir mejorando nuestros productos y servicios.

Nuestra estrategia es ser económicos, eficientes, duraderos y flexibles, y permitir que nuestros distribuidores puedan responder ágilmente a las necesidades del mercado y del cliente.

# REFERENCES

Many projects have already been installed by ATEİS in the Middle East and India, and the company is proud to have been associated with these major installations in the region – and particularly the Hospitality and Transportation sectors, where ATEİS' high end products have regularly been implemented to fulfill their demanding requirements.
